## Ideas for Baby Girl Shower Decorations by Tim Brandt

When the main theme of a baby shower hinges on the gender of the baby it is really important to make sure the theme is clear and carried out through every aspect of the party. A baby girl shower needs to make people think all about girls and the typical girl stereotypes work well to get this theme across. Baby girl shower decorations should focus on the color pink and generally convey the image of girls.

Some good baby girl decoration ideas include mirrors, bows, frills and lace. Small mirror and comb sets tied together with bows do double duty as table décor and favors. Anything frilly or lacy conveys the image of a baby girl, so using lacey table cloths is a great idea. Decorations can also be like fairytale princess themes. All these ideas reflect a baby girl and work great as baby girl shower decorations.

Free baby girl shower decorations can include things like flowers. Flowers and girls go hand in hand, so using flowers as decorations is ideal to convey a girly image. In addition, extra girl themed wrapping paper can be used to wrap empty boxes to use as centerpieces. These are great ideas when money is tight.

Baby girl shower decorations are perfect for a baby shower where the idea is to make it clear the baby is a girl. Little girls are cute and prissy and delicate, so anything that fits with those ideas works great. It is very simple to add a girly touch to almost any decoration.
